

PrintOffice

INTELLIWEB SOFTWARE SOLUTIONS PVT. LTD

www.intelliweb.co.in

ERP for Printing Companies

As Managers of a printing solutions company in a very competitive business environment we need to have a structured way of working with minimum loss of efficiency or quality of work output.

Plan

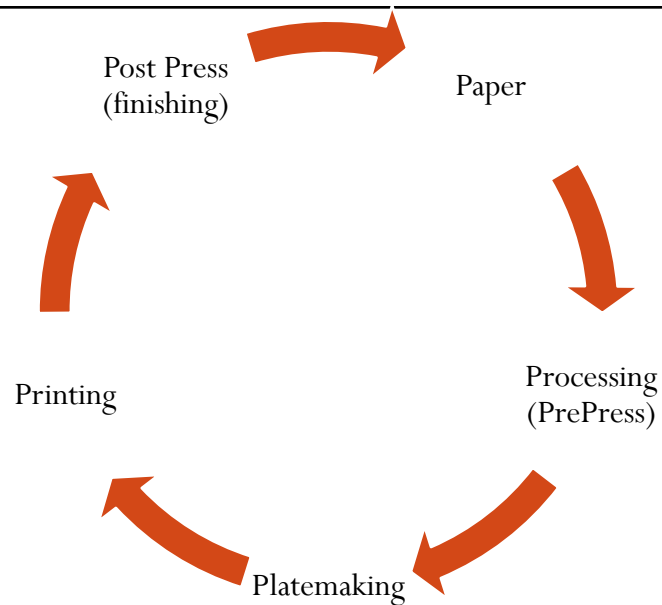

- Daily Production schedules keeping into consideration all variable issues affecting the organization at that time

Execute

- A systemized way of working independent of the quality of Staff
- Press Planned Productivity per shift/day – Keep the presses running
- Planned Job delivery commitments.
- Control Credit and Collections

Control

- Any variations from the systemised way of working
- Set and follow a well thought out process to Control
- Cost of Paper and other Consumables.
- Machine and Manpower's Utilisation
- Reduce Wastage especially of Paper which is the main input cost

How can PrintOffice be helpful?

1. PrintOffice puts in place a system in which all users adhere to a standard process in order to run the operations smoothly with efficient utilisation of man and machine.
2. PrintOffice enables managers to manage by exception often reminding them and normal users pending issues that need their immediate attention.
3. Reports (MIS) that give a feedback on utilisation of Machinery enable managers to make proactive decisions.
4. Short or Extra production
5. Inventory Control

Estimation Module:

Job Estimation – Template driven(customizable), gives Cost Breakup of a Job

Quotation and Order Acceptance Module

Quotation can flow from estimation or started afresh, Order Acceptance accepts a clients Purchase Order into the system with commercial and delivery instructions

Job Card Module:

Is central to the process. Multiple JobCards against an Order Acceptance. All aspects of the production (prepress, press postpress) of the Job along with planned quantities (Paper/Material/Chemicals/Plates...) are recorded. Further Actual Issues are attached to the Jobcard so variance can be tracked. Tracks Outsourcing , Extra work.

Press Schedule:

Press Utilisation viz. Productive v/s Standing time is tracked along with Excess/Short production v/s planned production is recorded, paper/plate wastage is recorded.

Purchase Order and Invoicing Module:

Indenting, Raw material Purchase, Spares Purchase, Work orders for Machine repairs. GRN for receipts , Pending supply against Purchase Order. Purchase Invoicing,

Inventory Module:

Raw Material Inventory, Spares inventory, Our stock/Clients stock, Ageing, Finished goods inventory, Branch Transfers.

Delivery Module

Delivery Challans including Proof of delivery, Unbilled challans etc, Not to be billed Challans for Samples and outsourcing.,

Billing Module:

Bills generated from delivery challans or direct mode, split bills, Challan Cum Invoice, Cash Memo,
